HPE GreenLake Solutions for SAS

Anshul Nagori, WW Technical Marketing Engineer, HPE

SAS Explore

Sept 2023

Financial services

Fraud detection, ID verification

Government

Cyber-security, smart cities and utilities
Large mission-critical applications

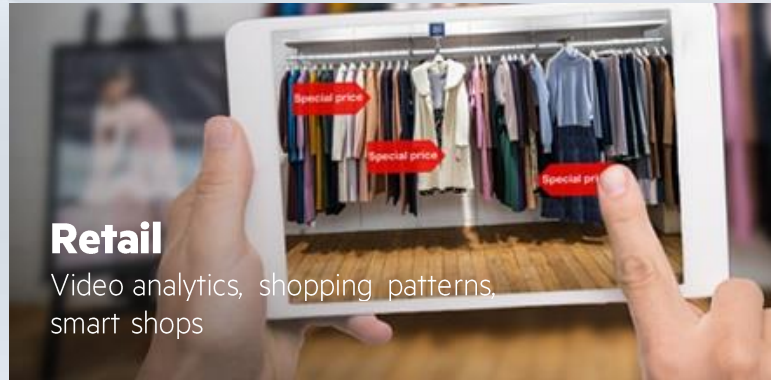

Energy

Seismic and reservoir modeling

Data is the lifeforce

Source: 451, 2022 Trends in Data, AI & Analytics

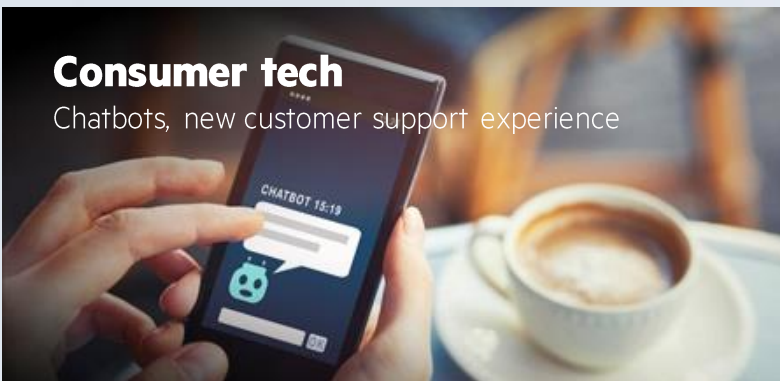

Retail

Video analytics, shopping patterns,
smart shops

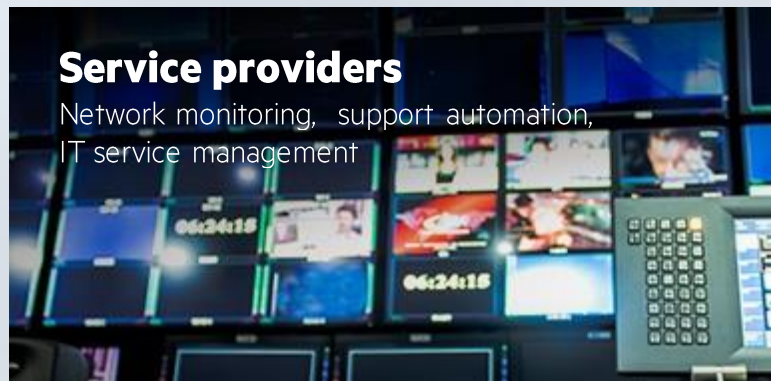

Health

Personalized medicine,
image analytics

Consumer tech

Chatbots, new customer support experience

Service providers

Network monitoring, support automation,
IT service management

Manufacturing

Quality control, video analytics
and prescriptive maintenance

The world is hybrid

but the true cloud experience is not everywhere

70%

Multi-gen IT | Data sovereignty | Security & Compliance |
Data costs and control | Latency, real-time decision making

30%

Speed | Agility | Self-serve | Pay-per use

Edge locations

Private data center

Colocation facilities

Public clouds

aws

Microsoft Azure

Google Cloud

Alibaba Cloud

What holds you back?

Data and infrastructure complexity

Impedes data-first modernization—edge to cloud

**Complex
management**

**Infrastructure
silos**

**Inefficient
scaling**

**Price performance
tradeoffs**

Complete your hybrid strategy with

HPE GreenLake

Cloud that comes to you

Delivers a
catalogue of services
from HPE and partners

Through a secure,
open edge to cloud
platform

Modernizes IT and
operations for your
apps and data

← Self-serve | Pay-per use¹ | Scale up and down | Managed your way →

Edge locations

Private data center

Colocation facilities

Public clouds

Google Cloud

HPE GreenLake

Platform
services

Connect

Networking
SD-WAN, switched,
wireless

Process

Computing
Rack-mount, HCI,
HPC, super-computer

Protect

Storage
Block, file, object,
backup & recovery

Orchestrate

Workload
VMs, containers,
bare metal

**One unified platform to run, manage and secure
your distributed enterprise**

HPE Solutions for SAS | At a Glance

- Large block, sequential I/O
- Throughput-based sizing
- >150 MB/sec/core throughput requirement

#1

SAS leads advanced and predictive data analytics market with 28% share

40%

SAS deployments on HPE

HPE Superdome Flex 280

HPE Synergy

HPE ProLiant DL servers

All throughput values indicate combined read + write performance values in GB/s.

HPE GreenLake

Flex Solutions

- Built on standard modules
- Horizontal and vertical workloads

SaaS

- Hybrid cloud services
- AIOps and Automation

IaaS

- Private cloud
- Compute / HPC
- Storage

←----- Enabled by HPE Services ----->

HPE GreenLake

Time

80%

shorter time to deploy IT projects¹

Risk

85%

less unplanned downtime²

Cost

45%

Reduced TCO for infrastructure due to eliminated need for overprovisioning¹

Sustainability

30%

Reduce carbon emissions with less energy use³

Simplify IT

65%

Operational savings for IT by reallocating internal IT resources to more strategic business initiatives²
