

VIRTUAL CARE

COMMONLY FACED PROBLEMS

- **DEATH DUE TO LACK OF FIRST AID AND RESPONSE ON TIME.**
- **PEOPLE DON'T REPORT ACCIDENTS TO THE POLICE, AND SO THE HOSPITALS DON'T TAKE CASES TILL THE FIR IS FILED.**
- **ONE STOP TO KNOW AVAILABILITY OF AMBULANCE AND BED USING ML.**
- **EMERGENCY CASES- LIKE HEART ATTACK, ELECTRIC SHOCKS, LABOR PAIN, ETC.**
- **CONSIDERING THE RISE OF MENTAL BREAKDOWN IN THE MODERN ERA.**

SOLUTIONS

App will Share live location of any accident happened.

Just by clicking SOS button you will be able to get the immediate help without any delay.

Our app will pop up the option to contact the nearest available hospital for the cure.

Patient will be taken to the nearest healthcare centre and response team will coordinate .

Our app will also create employment opportunities.

Videocall feature will be provided to contact with a nurse or a doctor available or even the pre recorded videos to be used as an immediate precaution

Using this ML model, we will sort the healthcare centers having the most availability of beds and being nearest to the emergency point to avoid delay.

Our app will automatically 100 and will inform the authorities for quick action.
