creation and
communication

WALLET CARD vs MOBILE APP

Anchoring channels use by interactivity and use frequency

Mobile Wallet Card

- ✓ Non-invasive technology
- ✓ No-barrier access
- ✓ Updated centrally at any time
- ✓ low frequency communication pattern
- ✓ Irregular communication pattern
- ✓ dynamic and simple UI
- ✓ medium interactivity level
- ✓ push notifications

Mobile application

- ✓ Necessity to install application
- ✓ Risk of drop when not used frequently
- ✓ Update initiated by user
- ✓ high frequency communication pattern
- ✓ stable and complex UI
- ✓ high interactivity
- ✓ push notifications

Typical applications

Mobile wallet card – insurance, utilities, transportation, health care, telecommunications

Mobile application – banking, ecommerce, internal applications

WHERE TO START?

... WITH COMMUNICATION!

Please scan me

Mobile wallet card

- ✓ Non-invasive technology – using it when needed
- ✓ No-barrier access – no need for apps installation
- ✓ Customer's pocket guide
- ✓ Easy to be understand and used
- ✓ Instant connection between business and customer

Less than 3 interactions monthly - wallet card is optimal communication channel

EMPOWERING WALLET CARD

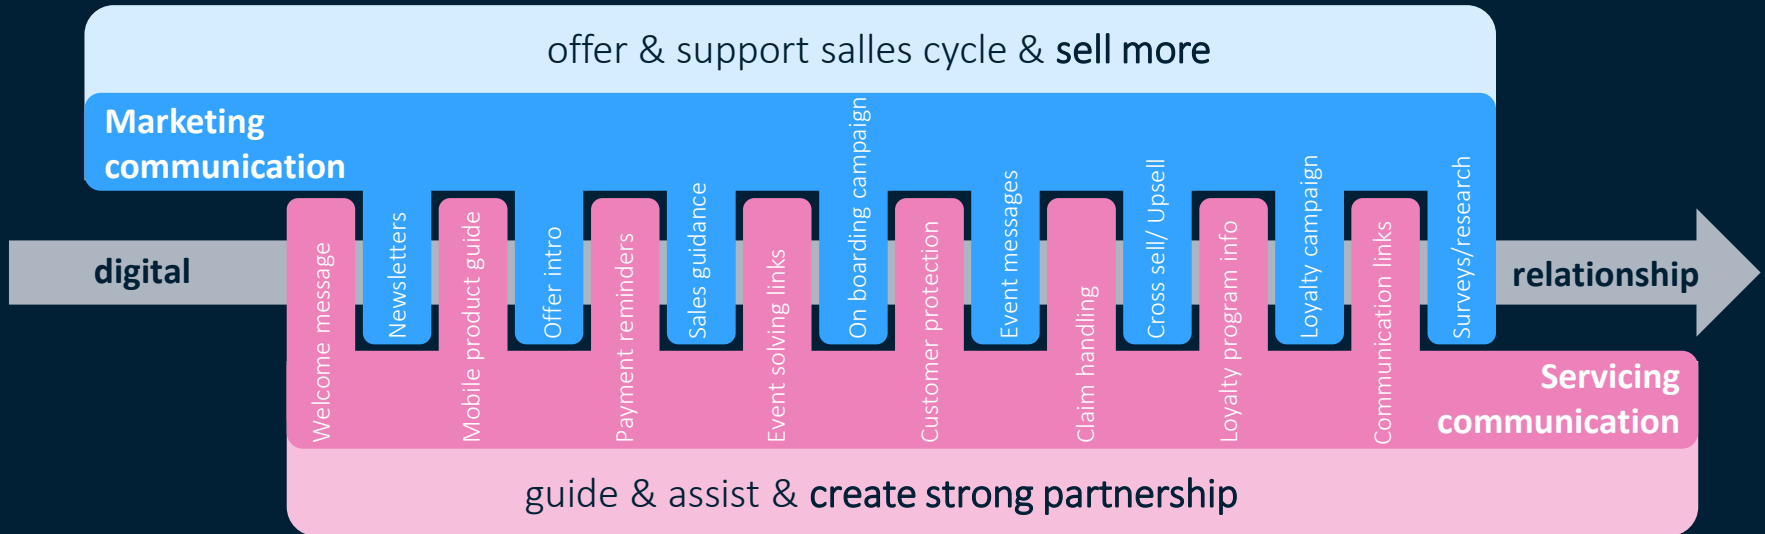

- ✓ Integration of event based reactive, and analytics based proactive communication
- ✓ Customer experience based on information and offer relevancy
- ✓ Communication simplicity driven by customer needs

ALL INTEGRATED COMMUNICATION

Relationship is not being build on offerings and sale, but on guidance, assistance and attainability when necessary

Successful offering and sale benefits from strong relationship
