Windowspatch AD

November 9, 2021—KB5007206 (OS Build 17763.2300)

- Microsoft släpper patch KB5007206
 - <https://support.microsoft.com/en-us/topic/november-9-2021-kb5007206-os-build-17763-2300-c63b76fa-a9b4-4685-b17c-7d866bb50e48>
 - “ After installing the November security updates, released November 9, 2021 on your Domain Controllers (DC) that are running a version of Windows Server, you might have authentication failures on servers relating to Kerberos Tickets acquired via S4u2self.”
 - “ End users in your environment might be unable to sign into services or applications using Single Sign On (SSO) using Active Directory on-premises”

Windowspatch AD

November 14, 2021—KB5008602(OS Build 17763.2305) Out-of-band

- Fix till patchen släpps 14e
 - <https://support.microsoft.com/en-us/topic/november-14-2021-kb5008602-os-build-17763-2305-out-of-band-8583a8a3-ebcd-4829-b285-356fb5aaacd7>
 - “Addresses a known issue that might cause authentication failures related to Kerberos tickets you acquired from Service for User to Self (S4U2self). This issue occurs after you install the November 9, 2021 security updates on domain controllers (DC) that are running Windows Server.”

Option i Viya

Skapa ny config

dstEnabled:

Kontrollera att det fungerar

The screenshot shows the 'New sas.scheduler Configuration' dialog box in SAS Viya. The dialog is titled 'New sas.scheduler Configuration' and has a close button (X) in the top right corner. The main content area is divided into two columns: 'Services:' and 'Schedule service'. The 'Services:' column contains a search bar with 'sas.scheduler' entered. The 'Schedule service' column contains the following configuration options:

- Services:** Schedule service. Service to which this configuration instance applies.
- acquireTriggersWithinLocks:** Provide additional locking when assigning jobs to clustered schedulers.
- allowAbsoluteJobURIs:** Allow the scheduler to run external URIs.
- dstEnabled:** Allow Daylight Savings Time functionality in the scheduler.
- jobTimeOut:** The maximum time a scheduled job is allowed.
- missfireThreshold:** The maximum time a scheduled job is allowed to miss its scheduled execution time before being skipped.
- threadPoolMax:** The maximum number of threads allocated to the scheduler thread pool.
- threadPoolQueue:** The number of jobs queued up waiting for available threads used by the scheduler thread pool.
- threadPoolSize:** The initial number of threads used by the scheduler thread pool.

At the bottom right of the dialog, there are 'Save' and 'Cancel' buttons.
