

Operationalizing Analytics

Implementing the Analytics Organization

Maintaining the Analytics Organization

Kick-starting the Analytics Journey

Generating & Prioritizing Use-cases

Rapid Value Approach

People, processes and technology

Analytics Use Cases

Analytics Factory

Analytics Ecosystem

Innovating the Business

SAS Kick-start the Analytics Journey

Approach

SAS Analytics Platform

Analytics solution capabilities to pilot and operationalize use cases

+

Implementation methodology

Proven "find-fast-or-fail-fast" approach, re-usage of experiences and roadmap for structured implementation approach

+

Staffing & skills

Team of experienced data scientists combined with customer's business specialists and data scientists

+

Enablement

OnDemand e-Learning, Web Tutorials and on-site enablement sessions

SAS Kick-start the Analytics Journey

Purpose and Deliverables

Better understanding of AI

Familiar with all activities and elements in model lifecycle management from data to production

Knowledge around usage and interpretability of AI models

Understanding of different types of AI models

Learning to identify bias in AI models and how to overcome the effects of bias

Knowledge about AI supported decision tools for better data-driven decision making

Understanding what is needed for becoming an analytics organization

Iterative & Agile Development Process

Understanding and structuring of data

Definition of initial data engineering

Implementation of security model and folder structure, if needed

Developing, testing and assessing AI models on platform

Getting one AI model ready for production

Documentation

Recommendation for next steps to become an analytics organization

Re-usage of experiences to innovate and define new use cases maximising business value

"Find-fast-or-fail-fast" approach to minimize risk and gain value quickly

Early involvement from end-users to meet requirements and gain commitment

Guided and tested approach to ensure a structured and efficient process

& Next Steps

SAS Kick-start the Analytics Journey

From Idea to Scaled Solution

Kick-off

Plan and Allocate Resources

Agree on dates for initial workshops and prototyping
Assign resources from Customer and SAS

Select Use Cases

Inspiration & Use Case Selection

Introduction & inspiration
Identify suitable use cases
Assess use cases; business value vs. complexity
Select use case for prototyping

Prototyping

Iterative & Agile Development Process

Develop analytics prototype
“Find-fast or fail-fast” approach
Usually offline data

Next Steps

Implementation Approach

Scale solution & continue improvements
Setup maintenance and governance organization

Operationalize

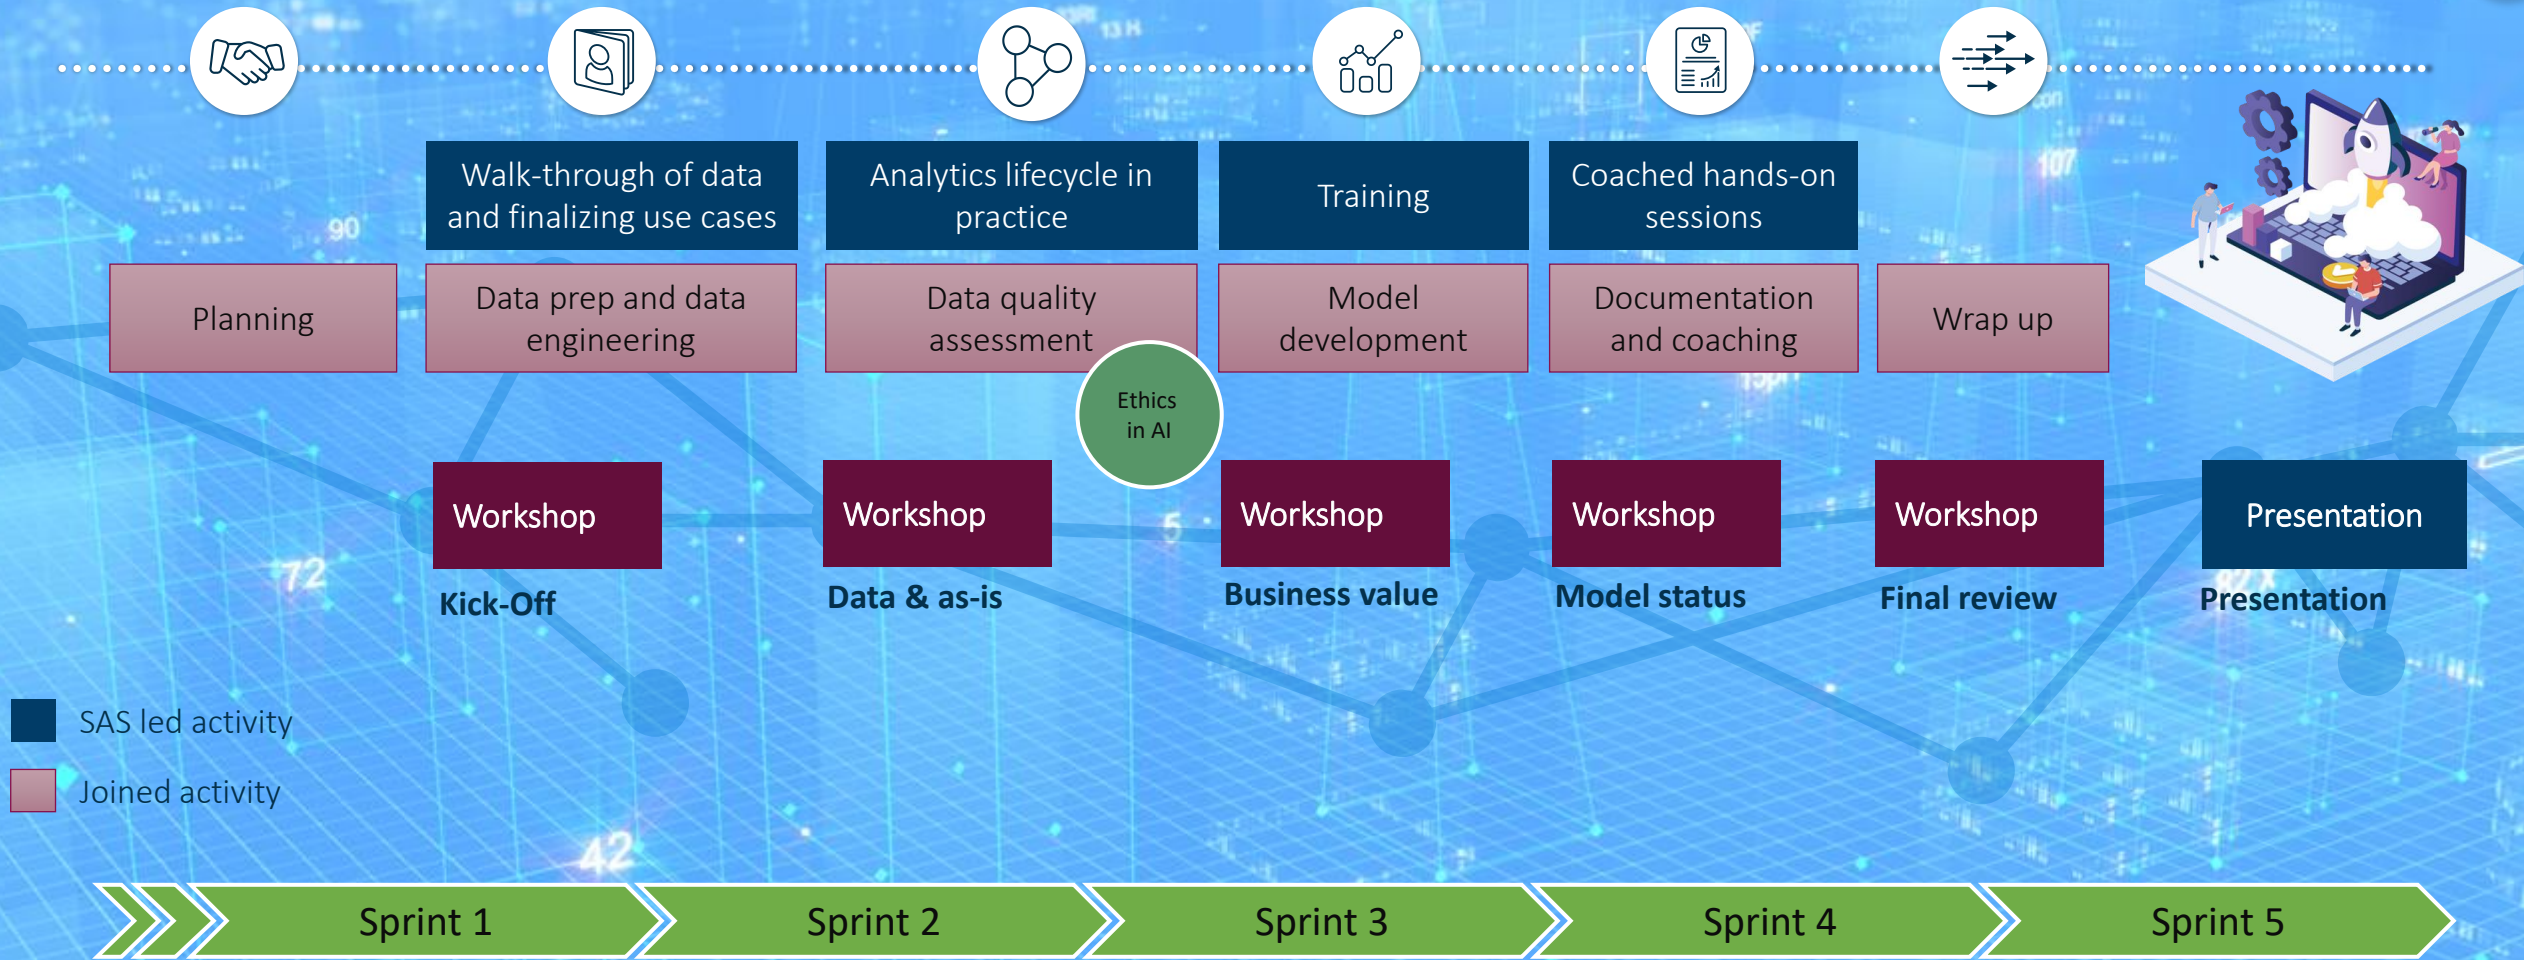

Model-Ops Assessment

Changed Way-of-Working
Create plan for scale-out and maintenance
Assess processes and people

SAS Kick-start the Analytics Journey

Timeline

SAS Kick-start the Analytics Journey

Outcome

Final Outcome

One AI model incl. presentation
Written documentation
Understanding of the use of AI in solving business problems

Customer target governance model for operationalizing AI
Recommendation for next steps to become an analytics organization
Transformation roadmap

List of use cases for future development

SAS Kick-start the Analytics Journey

Timeline and estimates

Timeline

Timeline is 5-20 weeks depending on

- Customer involvement
- Use case complexity
- Data complexity
- Model complexity
- SAS environment

Prerequisites

- Required software is installed (SAS 9.4 / Viya)
- Consultants will get direct access to data and SAS Platform
- Project team has access to relevant people at customer site

Roles

Customer

- Sponsor / business owner
- Project Manager
- Data Scientist(s)
- Business expert(s)
- IT / architect

SAS

- Project Manager
- Solution expert and Data Scientist(s)
- Architect
- Data Engineer

SAS Kick-start the Analytics Journey

Governance Model

Principles

Steering committee = strategical
Project management = tactical & operational
Project group = execution

An abstract graphic featuring a wavy, ribbon-like shape that flows from left to right. The color transitions from a vibrant pink on the left to a deep purple on the right, with a blueish-purple in the middle. The shape has a soft, glowing appearance. The background is white, with dark teal vertical bars on the far left and right edges. The left bar has a pattern of horizontal white dashes. The right bar contains a white 'S' logo.
