

SAS Info 2023 H2

Agenda

- Tervetuloa & SAS Info. Pietari Koskela, SAS (Finnish)
- **Why build content if SAS Viya APIs and LLMs can build it for you?** - David Weik, SAS
 - SAS Viya offers a comprehensive suite of API endpoints that allow you to interact with the platform in a programmatic way. From getting a list of folders, over creating SAS sessions, to training models for you in an automated fashion. Now of course you need a good way of interacting with them and deciding when to use which API, how about letting a LLM help you with that? By combining to powerful technologies we can create something much large larger than the sums of its parts.
- **SAS Studio: Uudet stepit, uudet mahdollisuudet**, Jarno Lindqvist, SAS
 - Tässä esityksessä esitellään SAS Studion uusia steppiä, jotka helpottavat ja **nopeuttavat työskentelyä. Esitys näyttää, miten voit hyödyntää steppien** tarjoamia toimintoja ja ominaisuuksia.
- **Syksyn SAS julkaisut: SAS Workbench, SAS EG Support for VIYA 4, SAS AppFactory, GAI (General Artificial Intelligence) hyödyntäminen SAS koodauksessa.** Pietari Koskela, SAS
- ~~Food & Drinks~~

Share Ideas That Inspire

Have you harnessed the power of SAS® software to make faster, more productive decisions? Wrangled data from multiple sources using expert data management skills? Deployed and managed SAS® Viya® environments in the cloud? Mitigated bias in your predictive models?

At SAS Explore, we're celebrating the power of analytics and AI – and the people pushing the boundaries of what's possible across all SAS platforms. We want to hear from you. You've got the knowledge to help your fellow SAS users tackle today's challenges, stay ahead of change and skill up for the future.

Call for content ends May 31.
