

User can open the Excel spreadsheet – that is linked to a SAS Dataset but cannot edit the filters.

Is this a permissions issue on the SAS Dataset?

### EXCEL File – link to SAS Data

The screenshot shows the Microsoft Excel interface with the 'Open Data Source' dialog box open. The dialog box has a 'Browse' button and a 'Search SAS Folders' field. The 'Look in:' dropdown is set to 'Libraries'. The file list shows various folders and files, with 'DARRYLLA' highlighted in yellow. The Excel ribbon is visible at the top, showing the 'File' tab selected.

# EXCEL File - Filters

The screenshot shows the SAS Design Studio interface with the 'Design' tab selected. The background displays a data table with columns 'Date' and 'RunTime'. The 'Date' column contains dates from 2020-09-01 to 2020-09-15. The 'RunTime' column contains values like '07:35:47,148' and '00:21:07'. A dialog box titled 'Modify Data Source - SASApp:DARRYLLO.CAMPAIGN\_RUNTIMES' is open, showing filter criteria:

- Filter description:
- MONTH Equal to 2020-09
- RunTime Greater than 00:20:00

Buttons at the bottom of the dialog include 'Show Preview', 'Validate', 'Advanced Edit...', 'Clear All', 'OK', 'Cancel', and 'Help'. The 'Display labels instead of variable names' checkbox is unchecked.

**User gets this error when they try to edit the filters**

The screenshot displays the SAS Add-In for Microsoft Excel interface. The ribbon is set to 'Table Tools' with the 'Design' tab active. The 'Source' is 'SASApp:DARRYLLA.CAMPAIGN', showing 1 of 68 records with 500 per view. A modal dialog box titled 'SAS Add-In' is overlaid on the data table, displaying an error message: 'Unable to open "SASApp:DARRYLLA.CAMPAIGN\_RUNTIMES". The library reference "DARRYLLA" on server "SASApp" was not found.' The data table below the dialog shows columns 'G', 'RunTime', and 'M' with various values.

G	RunTime	M
