

This page is really not needed...

Car Stuff...

Pretty good... Is it possible to include a line underneath, like I added?

USA	Buick	Cadillac	Chevrolet	Chrysler	Dodge	Ford	GMC
Mean MSRP	\$30,537.8	\$50,474.4	\$26,587.0	\$27,252.0	\$26,253.8	\$24,015.9	\$29,560.5
Mean Invoice	\$27,854.9	\$46,426.9	\$24,060.8	\$25,270.1	\$24,160.1	\$21,953.0	\$26,289.4
Mean HP	214.44	298.13	212.81	201.13	209.69	197.87	253.13
Mean Weight	3,757.7	4,363.6	3,640.2	3,534.3	3,638.8	3,748.9	4,731.4
Horse Power /Weight	570.69%	683.20%	584.62%	569.08%	576.27%	527.81%	534.99%
USA	Hummer	Jeep	Lincoln	Mercury	Oldsmobile	Pontiac	Saturn
Mean MSRP	\$49,995.0	\$24,518.3	\$42,875.6	\$27,972.8	\$23,763.3	\$24,156.4	\$17,234.4
Mean Invoice	\$45,815.0	\$22,644.7	\$39,135.8	\$25,657.6	\$21,749.0	\$22,159.6	\$16,068.0

Horse Power /Weight	493.75%	478.06%	602.11%	539.00%	496.04%	569.35%	500.75%

This is the footer to the report, it should go directly under it...

- Meow Cat...
- Bark Dog...
- Moo Cow...

Not bad here... Do you know if it is possible to tell SAS that lets say Xpct under the above table and footer, place the PROC ODS TEXT at this location? As of now, somewhat hardcoded.

The footer originally is inside the bottom portion of the table results, is it possibly to dynamically assign the footer below the table results, i.e. if the table didn't wrap, is there a function that SAS could use to understand that.

Look, due to this having to wrap, it overlapped. The first portion of the tables last row "Horse Power / Weight" was behind the second portion of the table

Footnote placement from the footnote statement. Less than desired for the table output, however could be used for other things.
