Crosstab 1 ✕

Course	Seats_Allocated	Enrollment	Calculated Item (1)	
ARH1000	344	321	13.69	
ARH2050	198	193	5.85	
ARH2051	62	62	2.00	

ARH1000: 321/344 = 93.3 This is the value I wish to display

ARH2050: 193/198 = 97.5 ""

ARH2051: 62/62 = 1.0 ""

I need to calculate the ratio of
Enrollment over Seats_Allocated
by Course.

Using the "New Calculated Item..." in VA
and typing
'Enrollment'n / 'Seats_Allocated'n
gives 13.69, 5.85, and 2.0

This is also replicated by uising the
"Show column subtotals" or
"Show column totals"

I am guessing because I also have Section
Numbers in the data which duplicates the
courses.

Term Year	Term Name	Session code	Course	Course Section	Course Type Code	Delivery	Course Credit Hours	Program	Department	Site Where Course Meets	Seats Allocated	Enrollment	Credit Hours	Fill Rate
2017	Fall		ARH2050	001	P	Traditional	3	Fine Arts	Art	1	34	33	99	97.06%
